

**REQUEST FOR
PROPOSALS FOR
PREPARATION OF LOCAL ROAD SAFETY PLAN**

The City of Fortuna ("City") is requesting your firm to develop a Local Road Safety Plan (LRSP). The purpose of a LRSP is to reduce roadway fatalities, injuries, and crashes through a framework of data analysis, hazard identification, and implementing proven safety countermeasures. LRSP's will also become required, beginning in Cycle 11, to be eligible for Highway Safety Improvement Program (HSIP) funds. The project will be funded through a state-only Caltrans grant.

The tasks outlined in the scope below are the general requirements as outlined in the FHWA manual *Developing Safety Plans: A Manual for Local Rural Road Owners* (https://safety.fhwa.dot.gov/local_rural/training/fhwasa12017/#table2.1). Consultants are expected to provide a detailed scope of work that covers the items outlined below, along with any additional items or suggested modifications that the Consultant deems necessary to provide full service to the City in delivering the described project.

The grant funding the development of this report is state only, and therefore there is no DBE goal for this project.

I. Project Funding

The funding for this project is from a State Only Grant administered through Caltrans Division of Local Assistance.

II. Contact Person
